Academic positions

11/2026 - Present **Royal Society Newton International Fellow at the University of Cambridge**
Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Cambridge CB3 0WA, UK
Research on vortex-gust wing dynamics using causal spectral methods.

10/2024 - 10/2026 **Postdoctoral Fellow at Massachusetts Institute of Technology (MIT)**
Department of Mechanical Engineering, MIT, Cambridge, MA 02139, USA
Investigating wall-bounded vortex dynamics and ML-based aerodynamic load prediction.

Education

09/2019 - 03/2024 **Doctor of Philosophy**
SimEx/FLOW, Engineering Mechanics, KTH Royal Institute of Technology, Stockholm
Specialisation in Computational Fluid Dynamics with the thesis: 'Space-adaptive simulation of transition and turbulence in shear flows', under the supervision of Prof. P. Schlatter and Lect. S. Rezaeiravesh.

06/2023 **Visiting Scholar**
Universidad Politécnica de Madrid, Madrid, Spain
Summer workshop to explore the potential of computer power in unravelling the causal turbulent dynamics. Turbulence workshop organised by Prof. J. Jiménez.

03/2023 **Visiting Scholar**
The University of Manchester, Manchester, UK
Exploration of information-theoretic metrics in wall-bounded turbulent flows to measure causal relations, under the supervision of Lect. S. Rezaeiravesh.

11/2022 & 11/2025 **Visiting Scholar**
Texas Tech University, Lubbock, Texas, USA
Research study on large-scale coherent structures in wall-bounded turbulent flows at high Reynolds numbers, in Prof. F. Hussain's group.

Oct. 2016 - Apr. 2019 **Master of Science, Aeronautical Engineering**
Politecnico di Milano, Milan, Italy
Specialisation in Aerodynamics with the thesis: 'Stability characteristics of wall-bounded flow with spanwise forcing'. Thesis supervisor: Prof. M. Quadrio.

Oct. 2013 – Sept. 2016 **Bachelor of Science, Aerospace Engineering**
Politecnico di Milano, Milan, Italy

If you would like to receive my full CV, please feel free to get in touch (dm2166@cam.ac.uk).
